

# Which Body-Worn Camera Is For You?

VB400

VT100

## VB400 - For Security Professionals

### RUGGED DESIGN

The VB400's can withstand impact that's tested to MIL STD 810G with it's strengthened exterior and can resist rain, snow, and dust that's rated IP67.

### BLUETOOTH CONNECTIVITY

The VB400 can automatically configure and begin recording via a Bluetooth hoister sensor when a fire alarm is drawn, enabling a speedier response.

### SHIFT-LONG BATTERY LIFE

Provide greater protection for lone-workers or staff working in hostile environments with the power of 12 hours of continuous recording.

### PEER-ASSISTED RECORDING

Capture critical moments with the ability to configure the VB400 along with your peers, the VB400 helps you reach multiple vantage points within 10 meters.

### PRE & POST RECORDING

Stop missing important interactions with pre and post recording. Capture a continuous loop of audio and video the moment the camera starts recording.

## VT100 - For Frontline Staff

### LIGHTWEIGHT & UNOBTRUSIVE DESIGN

The VT100 is discrete, compact, and can easily be assigned to staff and attached to uniforms with ease.

### EASY-TO-USE

Little to no formal training required to operate and can seamlessly integrate with existing workflows.

### LONG-LASTING

Charging the device often won't be necessary, ensure your device longevity with six months stand-by battery life.

### CUSTOMER-FRIENDLY APPEARANCE

Get your customer facing staff to stand out with VT100 brandable front tag feature, the customisable tag lets you place business logo or name.

### ACCESSIBLE & AFFORDABLE

Enterprises with a large workforce and/or multiple locations can rapidly and cost-effectively allocate VT100's as part of a health, safety, or accountability program.
