About Iridium

TR Telecom is a service partner for the Iridium satellite network which is the only communications network to offer truly global voice & data communications. Iridium utilises a network of 66 low-earth orbiting, crossed linked satellites, to gain coverage right around the globe including airways & polar regions. Iridium's unique ability to provide total global coverage makes it the popular choice amongst industries including defence, maritime, aviation, emergency services, government agencies, mining, oil & gas, forestry & transportation. The Iridium network is accessed via Iridium handheld terminals that offer complete portability without worrying about current satellite positioning.

TR Telecom understand that each of our customers have differing satellite telephony requirements so we offer a wide range of plans to ensure that we can find a plan to match anyone's needs whether they be an individual, a small fleet or a large company.
