About Iridium

TR Telecom is a service partner for the Iridium satellite network which is the only communications network to offer truly global voice & data communications. Iridium utilises a network of 66 low-earth orbiting, crossed linked satellites to gain coverage right around the globe including airways & polar regions.

Iridium's unique ability to provide total global coverage makes it the popular choice amongst industries including defence, maritime, aviation, emergency services, government agencies, mining, forestry, oil & gas and transportation. The Iridium network is accessed via iridium handheld terminals that offer complete portability without worrying about current satellite positioning.
